HEMEROCALLIS, HOSTA AND FERN

*Now available for summer planting for
woodland and shade gardens*

Hemerocallis — Daylilies are available in many ranges of color: gold, orange, peach, pink, rose, purple, red, yellow, cream to near white, and also bicolor. Early, midseason and late varieties available including newer ever-blooming selections. Easily adaptable to most soils and sites.

Hosta — Various foliages to choose from including green, blue, gold and variegated. They produce summer blooms in shades of white and lavender, some with sweet fragrance. Adaptable to both shade and part shade on most soils. Choose from over 20 select varieties including dwarf, medium and larger types.

Ferns — These plants bring lushness to the garden, even in the heat of summer. Outstanding in the woodland garden or near ponds. A great plant that is not on the menu for deer. We offer an extensive selection of several genera.
